

**Question 1**  
Which of the following is an example of Commutative Property of addition?

A.  $2 + 7 = 9$     B.  $2 + 7 = 7 + 2 - 2$

C.  $7 \times 1 = 7$     D.  $(2 + 7) + 3 = 7 + (3 + 2)$

**Question 2**  
Which is an example of Identity Property of addition?

A.  $2 + 3 = 3 + 2$                       B.  $1 \times 6 = 6$

C.  $(1 + 2) + 3 = (2 + 3) + 1$     D.  $6 + 0 = 6$

**Question 3**  
Which is an example of Associative Property of addition?

A.  $3 + (4 + 5) = (3 + 4) + 5$     B.  $5 + 3 = 3 + 5$

C.  $3 + 0 = 3$                               D.  $3 + (-3) = 0$

**Question 4**  
Which statement is NOT correct?

A. Changing the groupings of the addends will not affect the sum.    B. Changing the order of the addends will not affect the sum.

C. Changing the groupings of the addends will affect the sum.    D. When you add 0 to any real number, the sum is the number itself.

**Question 5**  
Which property of addition does the following expression illustrate?

$9 + 0 = 9$

A. Distributive property                      B. Zero Property

C. Commutative property                      D. Identity property

**Question 6**  
Which property of addition is used in the following?

$(5 + 12) + 6 = 5 + (12 + 6)$

A. Commutative Property                      B. Associative Property

C. Distributive Property                      D. Additive Identity Property

**Question 7**  
Which property of addition is used in the following?

$4 \cdot (6 + 3) = 4 \cdot 6 + 4 \cdot 3$

A. Associative Property                      B. Commutative Property

C. Distributive Property                      D. none of the above

**Question 8**  
Which property will you use to simplify the following expression?

$3(y + 2)$

A. Commutative Property                      B. Zero Product Property

C. Associative Property                      D. Distributive Property

**Question 9**  
Which of the following does not show Commutative Property?

A.  $x + y = y + x$     B.  $xy - 3 = xy$

C.  $yx = xy$                                   D.  $3 + y = y + 3$

**Question 10**  
When simplifying expressions with parentheses, you will be applying the \_\_\_\_\_.

A. Distributive Property                      B. Commutative Property

C. Associative Property                      D. Identity Property
